

## Pricing Plan and List of Services.

- **RFID Timing Services (\$500)** – If you have less than 150 registered participants, you will pay a total of \$500 with \$150 due immediately. This \$150 is a non-refundable deposit that will ensure we hold the date for you. The remaining balance of \$350(+) is due prior to the start of the race. If you have more than 150 registered participants the fee is calculated at \$2 per person starting at #151. (Example: If you have 200 participants, you will pay \$500 plus \$2 each for participant 151-200. Your total would be \$600.)
- **Hotel (\$125)** – If your race has pre-registration pick up on the night before the race or if your race is more than 75 miles from Somerset, Kentucky (42503), we will request a hotel in your area. This arrangement will be determined when the race is booked.
- **Non-Standard race fee (additional \$250)** – This is for events that require more work than the standard 5K, 10K, or up to a half marathon event. For example, if your event will last longer than 6 hours (start of race to last finisher) or if you are hosting two or more events on the same day.

**We can provide many services free of charge that most other professional timing services do not provide. Here is what we can and will do for you, at no additional charge.**

### **1. Free Online Representation and Results**

We create an event webpage for every event we time so that we have a place to post results after the race. You can send us any document, course map, mail-in registration forms, or anything else you want posted to the website.

### **2. Bibs, RFID tags, etc.**

We prefer to supply the bibs for your event, and we do this at no cost to you, however if you have custom bibs, that is fine too. The RFID tags we use are disposable. They are paper-thin and simply adhere to the race bib. The tags will be attached to the bibs prior to the race and there will be extras available for race day registrations.

Our software also has the ability to print off basic registration forms for your event in case you forget them on race day. These registration forms can have a course map printed on them. With our system, we will set up your finish line 10 feet wide, and there are no mats or cords for the participant to run over and no archway for them to run under. If you have your own archway, you're free to use it. Our antennas will sit on one

side and provide 4 read zones (each achieving 99+% read rates) that the runners will pass through before exiting the finish line chute. With this setup, we consistently achieve 100% read rates!

### **3. Mass Emailing**

Our software can easily send out any announcements you want to make before or after the race. I always send an email out to every participant that has provided his/her email address after the race to thank them for attending and direct them to the results page.

### **4. Results on demand**

At any time during the race, we have the ability to print off overall and age division results.

### **5. Who is on the course?**

This software can easily determine who is left on the course at any point during the race. If you do not have a vehicle following the last runner/walker, we can tell you which individuals have not crossed the finish line.

### **6. Timing Clock at finish line**

Race timing clock provided at finish line.

### **7. Packet pick up (day before and/or on race day)**

We will help operate both the pre-registration table and the race day registration table. This is a part of our overall process, so that we can enter any race day registrants or make changes to the race roster while participants pick up packets. This is one area where volunteers will be needed to collect late registration fees and disperse packets.

### **What we expect from you:**

1. Your group will need to provide at least 6 volunteers that will be able to arrive 30 minutes prior to the start of registration for training on the registration process and finish line procedures. These volunteers will help with registration and then move to the finish line after the race starts. A minimum of 6 volunteers will be absolutely necessary. The volunteers are expected to be able-bodied, friendly, and competent to handle the fast-paced environment at the finish line. I don't recommend using children under 16 years old for volunteers.
2. Do not start the race until we have confirmed that we are ready for you to start the race.
3. If you will have any non-timed events (for example a 1-mile fun run/walk) then this event is to start either before or after the race - there should be no overlapping of the events because this will confuse the finish line crew.

4. Registration will end no later than 5 minutes before the start of the race.
5. You will need to provide us with the participant information in Excel format (we will provide the format) as soon as online registration closes - no later than 5pm the day before the race. This Excel document should include a minimum of: Name, DOB (or age), Sex, Athlete Type (runner, walker, other), and Email address.
6. You will make the following announcements:

- 1) To avoid confusion please do not run through the finish line more than once and if you did not register for the race, do not cross the finish line.*
  - 2) Bib Numbers should be on the front of your outermost layer of clothing and visible well before reaching the finish line.*
  - 3) Do not bother the finish line crew about wanting to see your time. They will periodically print results and post them for you to view.*
7. The final payment is expected on race day. If for some reason payment cannot be made on race day, please let us know prior to the race so that arrangements can be made.
